

We are a historical contemporary art gallery with an exhibition center in Brescia (Italy),

viale Venezia 90 and offices in Milan and Nice.

We hold the general archives of Antonio Bueno, Xavier Bueno and Remo Squillantini and photographic archives of artists such as Renato Natale Chiesa, Alain Leroy, Ludek Moudry and Charlotte Ritzow.

Our mission has always been to spread the art market and increase the knowledge of established artists, but also of young emerging artists.

For this reason is born at our gallery, from April 2006, „Ar-tinterni“, an auction house that follows the evolution of the market by providing services and information for collectors and organizing public auctions with constant frequency, both in the gallery on line.

You can register to receive free, always free, auction catalogs, in digital form in low and high resolution, you can download freely. Upon request, equally free, can get to your address book version of the catalog.

We would like to know more new collectors and artists who offer innovative networking opportunities.

We are also interested in galleries and artists who want to exchange exhibitions and further display possibilities.

Contact us to know and to further clarify our and your goals.
